COURSE DESCRIPTION:
This course provides an overview of international financial economics, developing analytic tools and concepts that can be used to analyze world economic policy debates. It covers the international implications of macroeconomic policies, international monetary arrangements and institutions, and the causes and consequences of financial crises. There will be heavy emphasis on understanding and using data to study country experiences -- with examples drawn from developing and industrial economies.

The course will be structured around the tools (models) of open economy macroeconomics, using primarily graphs, and occasionally equations. However, motivation for these tools, and examples of their use will always be taken from current and recent real-world macroeconomics events and conditions.

COURSE PREREQUISITES:
PUBPOL555 (Intermediate Microeconomics) or PUBPOL 556 (Intermediate Macroeconomics); or the equivalents, and graduate standing.

COURSE REQUIREMENTS:

Assignments: The five short assignments that will ask you to write short essays, collect and analyze data, and problem solve.

Class Participation: Participation in class discussions of readings and assignments is required.

Group Project: This will be an assessment of the macroeconomic performance and macroeconomic problems in a particular country; more detailed information on the project is available on the course Canvas site. Groups will present their project findings to the class in April.

Exam: There will be an in-class (closed-book and closed-notes) policy-problem essay-based exam. It will cover all the topics discussed up to that point in the course. I will distribute three questions the week before the exam which will consist of one of these questions and one "new" question.

The Ford School website academic expectation page: http://fordschool.umich.edu/academics/expectations describes my expectations for academic integrity, accommodations for students with disabilities, information about mental health services, our inclusivity statement, expectations regarding class attendance and assignments, and Ford School norms for use of technology in the classroom and during office hours.
**COURSE READINGS:** The main *required* textbook for this class is:

Students may use earlier editions of the textbook (though be aware that chapter numbering may have changed across editions). All required readings (with the exception of the textbook) are available off the web. Assignments, non-textbook readings, and (the most up-to-date) reading list will be available electronically on our course Canvas site.

In addition to the listed course readings, students are urged to stay up-to-date with current events in international financial markets. Excellent sources include the *Financial Times*, *Wall Street Journal* and the *Economist* as well as numerous blog sites that provide macro and financial news and analysis, examples include:
