**Great Depression to Great Recession: Macroeconomic Policy and the Business Cycle**

Josh Hausman

**Course Information and Procedures**

Location and time

Class meets Tuesdays and Thursdays 1:10-2:30 in 1210 Weill.

Description

Since the 2008 financial crisis, most developed countries have suffered high unemployment and slow growth. What are options for policymakers in this environment? This course will analyze central issues in macroeconomic policymaking through the lens of history. Students will apply analytical tools to understand the consequences of monetary, fiscal and financial market policy in the Great Depression, in Japan after 1990, and in the current Great Recession.

Prerequisites

This course assumes prior knowledge of introductory macroeconomics. If you have questions about this, please talk to me.

Course requirements

There will be reading quizzes, 2 problem sets, a short (5 page) paper, two midterms, and a final. The final will be cumulative.

Grades will be weighted as follows:

- Problem sets, reading quizzes (see below), and class participation: 10%
- Short paper: 25%
- Midterms: 35%
- Final: 30%

How to do well in this course

This course's combination of economics and history makes it both challenging and rewarding. To do well in the course, you will need to master basic macroeconomic theory. The problem sets are designed to help you do this. You will also need to learn a substantial amount of

macroeconomic history. Much of class time will be spent on this, but it will also be essential that you devote significant time to the readings. In number of pages, the reading list is light. Rarely are more than 60 pages assigned in a week. But I will expect that you come to class having read every page carefully. When parts of readings were not critical, I deliberately assigned only excerpts.

To give you an incentive to do the readings before class (and to attend class!), each class will begin with a very brief one-question, three-minute quiz. It will be a question that will be easy to answer if you have done the reading and difficult to answer if you have not. Since it is likely that you will at some point have a good reason to miss class, I will drop your two lowest quiz scores.

### Students with Disabilities

If you believe you need an accommodation for a disability, please let me know at your earliest convenience. Some aspects of this course may be modified to facilitate your participation and progress. As soon as you make me aware of your needs, I can work with the Office of Services for Students with Disabilities to help determine appropriate accommodations. I will treat any information you provide as private and confidential.
