INTERNATIONAL TRADE POLICY

SYLLABUS

----------------------	---------------------------	------------------------------	--------------------------	------------------------------	--------------------------------	--------------------------	--------------------------

PURPOSE: The aim of this course is to teach you a lot about the economics -- and a little about the institutions -- of international trade and trade policy. The course is companion to SPP/Econ 542, International Finance Policy, which deals with international macroeconomic topics such as the balance of trade and balance of payments, determination of exchange rates, and international macroeconomic policies. Each course will also include the bare essentials of the other course so that if you take only one of them, you won't be lost in the world economy.

The course is mainly about trade policy. You will learn what trade policies are, how they are used by the United States and other countries, and how their use is restricted by international agreements. More importantly you will learn how to use economic modeling to understand the effects of trade policies and to quantify these effects. Along the way you will also learn about the institutions of the world economy, especially those that have to do with trade. And you will learn a little bit about the economic theories of why nations trade, and why they gain from trade.

Prerequisite: PubPol/Econ 555 or equivalent course in intermediate microeconomics

Organization: The course meets twice a week, Mondays and Wednesdays, 8:30-10:00 AM, in room 1220 Weill.

TEXTS

The textbooks for the course are

Krugman, Paul R., Maurice Obstfeld, and Marc Melitz ("KOM" below), **one** of the following as explained below:

International Economics: Theory and Policy, 9th edition, Addison Wesley, 2012, isbn-13 #978-0-13-801896-2

International Economics: Theory and Policy, 10th edition, Pearson, 2015, isbn-13 #978-0-13-801896-2

International Trade: Theory and Policy, 10th edition, Pearson, 2015, isbn-13 #978-0-13-342367-9

Jackson, John H., *The World Trading System: Law and Policy of International Economic Relations*, Second Edition, MIT Press, 1997, isbn #0-262-60027-7.

There will also be a number of additional readings that are required. All are available under Files/Resources/Readings on Canvas. Most of the readings are also available free to the public on the web, through links included on this syllabus. A few readings are available through subscription sites, including ones subscribed to by U of M (e.g., JSTOR, Proquest). And a few are available only on Canvas.

Because of the speed with which issues evolve, readings selected in advance can never cover all of the latest developments. We will therefore spend some time each week discussing recent news related to trade and trade policy. You should follow current issues of international trade policy by reading daily periodicals such as the *Wall Street Journal*, *New York Times*, or *Financial Times* or weekly publications such as *Business Week*, or *The Economist*. Student subscriptions to these publications are available at reduced prices. I also post links to relevant news items on my personal website. We will devote some time each week to discussing the news.

NOTES on the Krugman, Obstfeld, Melitz text:

The most recent edition, the 10th, came out last year, 2015. Unlike previous editions, this is in three forms: one that combines international trade and finance like previous editions (which I ordered for you, but the publisher did not send me); a second that covers only trade (that they did), and a third that covers only international finance. If you intend to buy this new edition, you might want to choose based on whether you plan to take PubPol 542, International Financial Policy, at some point, since it will likely use the same book and you'll save money by buying the combined text rather than the two separate ones. However, 542 is not being offered this year. Alternatively, you might want to buy a used copy of the 9th edition from 2012, or even an earlier one. Coverage should be roughly comparable.

I provide chapter and page numbers for the trade-only version of the 10th edition and for the 9th edition. If you have the combined 10th edition, I suspect that the chapters and page numbers will be very similar to the 9th edition.

QUESTIONS ON READINGS

For each topic I will provide a link to a page or more of questions on the readings. Links to the first few are here from the start, and others will be added as the term progresses. These questions have several purposes:

- To assist your studying the material. I suggest that, when you finish reading and making notes on an assigned reading, you immediately see if you can answer these questions. If not, go back and look for the answers while the reading is fresh in your mind.
- To provide the basis for in-class discussion. I will ask a few of these questions during class discussion, and by preparing beforehand you'll be able to participate.
- To give you a glimpse of a small part of what will appear on exams. In addition to asking you to understand and use the economic tools in the course, exams will also include a few more

qualitative questions and some of these will be drawn from these posted questions.

REQUIREMENTS

Requirements for the course consist of a series of problem sets that will *not* be graded, three short papers that will be handed in during the term and graded, and two exams. The weights on each of these requirements, as well as class participation, in determining your grade will be as follows:

Problem Sets	0%
Class participation	10%
Papers	30%
Exam #1	30%
Exam #2	30%

SCHEDULE

Paper #1	Wednesday, October 12	8:40 AM
Exam #1	Monday, November 7	in class
Paper #2	Wednesday, November 16	8:40 AM
Paper #3	Monday, December 12	8:40 AM
Exam #2:	Tuesday, December 20	8:00-10:00 AM

WRITING ASSISTANCE

Your papers will be graded on both content and presentation, which means you should take full advantage of the Ford School resources for helping you with your writing. See <http://fordschool.umich.edu/writing-center/> for more information, including links to the websites for signing up for advising appointments.

EXPECTATIONS AND ACCOMMODATIONS

Please see <http://fordschool.umich.edu/academics/expectations> for the Ford School's policies regarding the following, all of which will be followed in this course:

- Academic integrity
- Accommodations for students with disability
- Student mental health and wellbeing
- Inclusivity
- Attendance and assignments

Regarding technology in the classroom, you are welcome to use laptop computers and handheld devices during class for legitimate class-related purposes, such as looking up current news and other information relevant to class discussion.

COURSE OUTLINE AND READING LIST

NOTES:	<p>1. Click title for citation; click <u>Online</u> for item if on the web; for the few items not on the web, see <u>Canvas</u>.</p> <p>2. Copies of all readings other than from the two textbooks are also available in <u>Canvas</u>.</p> <p>3. All readings are required unless marked "optional," but those marked with a tilde, ~, represent views that are not necessarily justified by economic analysis. They contain useful factual information, but I disagree with some of their interpretations, and they are here so that you will be aware of a range of views.</p>
